# BATHROOM COLLECTION 2024

Splashwall Shower Panels are the ideal alternative to tiles, allowing you to transform your bathroom easily and quickly.

Our panels are designed to be easy to install and can be fitted onto virtually any surface for a watertight finish. With a huge array of different designs available, we have something for every bathroom with our five product ranges, all backed by our 15 year guarantee.

## INSPIRATION

Take a look through the latest trends and how you can achieve stunning looks with Splashwall.

## ACRYLIC PATTERNS

Beautiful designs with a high gloss, glass like finish.

## ALLOY

Solid colour with a high gloss reflective or matt finish.

## ELITE

Our most innovative bathroom panels with a 100% waterproof core & stunning postformed edges.

## LAMINATE

Stunning designs inspired by nature with complementary finishes.

## COMPOSITE

Inspired by subway tiles for a modern metro look.

## SPLASHBACKS

Vanity Splashbacks designed to perfectly match our shower panels.

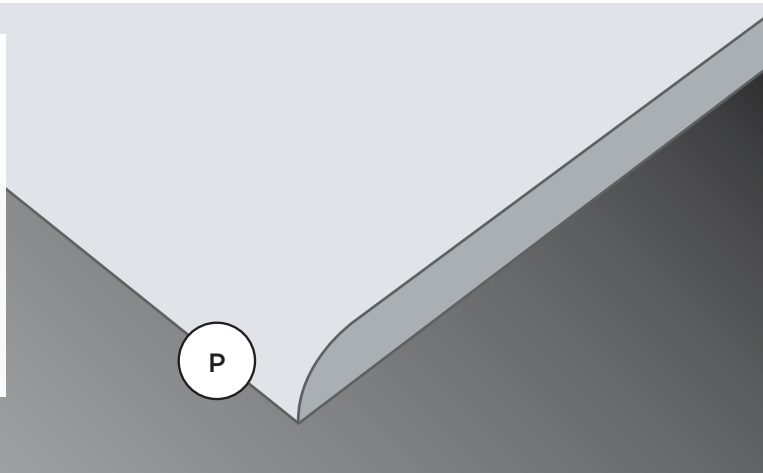

# ABOUT OUR PANELS

## EDGE TYPES

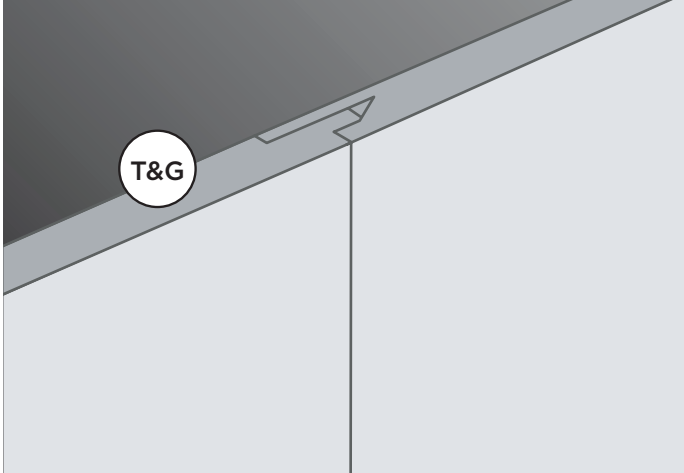

We offer four ranges of bathroom panels, each offering a different finished look and design opportunities. Find out more here about what the edge types mean for your design.

**POSTFORMED**

Our patented postformed edges are only available in our Elite range. This innovative technology means that you don't need to finish your design with trims, but also makes it easy to create beautiful external corners. You can also use Postformed panels to create half height walls, simply flip the panel 90°.

**P**

**T&G**

**TONGUE & GROOVE**

Our tongue and groove panels are available in both the Elite and Laminate range.

These go together with sealant which means you don't need H-joints to join multiple panels together across a flat wall.

**SQUARE EDGE**

Square Edge panels are simply that, flat edges. These panels will require H-Joints to panel across a wall to achieve the watertight lock. Our Alloy and Composite ranges both come with square edges, but don't worry we offer stunning trims to complement the design.

## WHAT IS A WALL PANEL?

Bathroom wall panels are the innovative and easy way to transform your bathroom.

Our large format panels (typically 2420mm high x 1200mm wide) with beautiful decorative surfaces can be easily applied onto your bathroom walls, even over existing tiles with a small amount of prep. Panels are securely fitted to the wall using our adhesive and create a watertight finish using our silicone and trims (where necessary).

We have five stunning ranges of bathroom panels each offering a unique finish.

Elite, is the latest innovation in bathroom wall panels, created using a 100% waterproof core and patented tongue and groove system which means you don't require trims.

Unlike tiles, our panels don't require a specialist fitter and can be installed in a matter of hours, not days, saving you time and money. Plus, aftercare is a breeze with no mouldy grout to clean, simply wipe down with a non-abrasive cloth.

Elite - see page 24

Elite - Marmo Migliore Page 29

## WHY WALL PANELS?

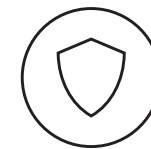

### EASE OF INSTALL

Our wall panels are both easy and quick to install when compared with traditional tiles. Panel install can be done in a matter of hours, rather than days.

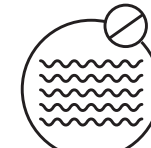

### COST SAVING

With no specialist tradesperson required to install, you can save on labour costs.

### 15 YEAR GUARANTEE

Splashwall Panels are guaranteed to remain watertight and waterproof for 15 years from date of purchase, as long as they've been installed as per our instructions, using our sealants, adhesives and trims where applicable and maintained as per our recommendations.

### NO GROUT

Unlike Tiles, our panels are installed using adhesive and silicone only, which not only means it's easier, it also means you won't be dealing with mould.

### EASY TO CLEAN

Thanks to the lack of grout, our panels are a breeze to maintain. Simply wipe clean with a bleach free cleaner and non abrasive cloth.

Please note some Alloy Vanity Splashbacks are double sided.

## FREQUENTLY ASKED QUESTIONS

Elite - Light Oak Page 39

### What is the Guarantee?

Splashwall Alloy splashbacks are guaranteed for their lifetime. We will make good by repair and/or replacement any Alloy Splashback which can be shown to have failed by reason of defects in its manufacture, subject to fair wear and tear. Other Splashwall Panels are guaranteed to remain watertight and waterproof for 15 years from date of purchase, as long as they've been installed as per our instructions, using our sealants, adhesives and trims where applicable and maintained as per our recommendations. Regular maintenance and care is required to ensure your system stays watertight. Systems where the sealant has failed due to lack of maintenance will not be valid under our guarantee.

### How do I install Splashwall panels?

Each of the different ranges are installed differently, therefore we strongly recommend you review the installation instructions on [www.splashwall.co.uk](http://www.splashwall.co.uk). If you have reasonable DIY skills it's possible to fit these panels yourself, however you need to be completely confident with what you are doing before starting the project.

### Design Patterns

Our wall panel patterns are not designed to align across joints. You can achieve this look with some careful scribing on site.

### Are trims available for Elite?

Thanks to our product innovation, our Elite range does not require trims thanks to the waterproof core and patented tongue and groove connection. As such, we don't sell trims suitable for this range. Our complete adhesive and sealant makes it watertight and gives you the 15 year guarantee.

### How much adhesive and sealant is required?

For our Acrylic pattern range, 2 x tubes of adhesive are required to bond a 1200mm panel to the wall. 1 tube of sealant contains 20 linear meters at a 5mm bead. For our Elite, Laminate and Composite ranges, 1 tube of adhesive is required to bond a 1200mm panel to a wall. 1 tube of sealant contains 20 linear meters at a 5mm bead.

### How do I clean Splashwall Panels?

Simply wipe down with a moist, non abrasive cloth and mild detergent. Avoid using strong cleaners that contain bleach as this may affect the design.

### Can I fit panels over tiles?

Yes, the Laminate, Composite, Elite and Alloy panels can be fitted to tiles on the basis they're clean, smooth and solid with all existing sealant removed. The tiles should be scarified with abrasive paper and degreased to remove the top waterproof layer. To install Acrylic pattern panels over tiles simply fix a plywood or MDF board to the tiles and panel over it.

### Can I hang wall mounted items to Splashwall panels?

Yes, wall mounted items can be hung on panels as long as the fixings go through the panel into a solid wall behind. Fittings such as shower attachments and screens can be fixed directly through the panels into the panel lining surface using suitable fixings. Heavier items will need solid fixing points behind the panels to provide the necessary support, these should be considered when planning your installation.

### Where can I purchase Splashwall panels?

Splashwall panels are only available through B&Q, to find your local store visit:

**B&Q:** [www.diy.com](http://www.diy.com)
